Feel the
Difference

- MODULAR
- UPGRADABLE
- CONTEMPORARY
- REVOLUTIONARY
- and AFFORDABLE

CHATTANOOGA GROUP, INC.

The ES2000's flexibility allows you to accommodate any body shape.

Finally, the table you've been waiting for...

THROUGH many interviews, customer feedback and over a thousand hours of computer design time, we are confident that we have found just what you are looking for in an adjusting table. Introducing the all new Ergostyle™ 2000 Adjusting Table. You'll immediately notice the contemporary looks, fully enclosed lifting system, extending ankle rest and the all-new headpieces. Or perhaps your eye will be drawn to the dual foot pedals for elevation control or our incredible Accelerator II Drop technology. But we guarantee you won't be able to overlook the most revolutionary feature that is hidden just below the cushions.

At the heart of the new ES2000 is a breakthrough in modular design. The Ergostyle 2000 brings you the first drop module that allows complete drop upgrades in a matter of minutes. Want to add drops to your table later? Move a drop from the lumbar to the thoracic or pelvic section? No problem. Best of all, the Accelerator II drops have the lightning fast feel you've come to expect with Ergostyle tables, including our full cushion drop action that means no "dead spots." To put it simply, we're revolutionizing the way you work.

It also includes all the features you have come to count on in our original Ergostyle Adjusting Tables, plus a lot more. Fully enclosed lifting system, seamless cushions, break-a-way chest, ergonomic controls and great looks, to name a few. Elevation range starts at a low 20" and can travel up to 32" in as little as 11 seconds.

The Ergostyle 2000 brings our adjusting table product line to a new level. Automation in design and manufacturing has enabled us to bring this new table line to you for a price you won't believe. Chattanooga Group quality and performance backed by our worldwide service support network is the foundation of all Ergostyle tables.

The Accelerator II Modular Drop

...customized for you today and into the future

WE'RE taking modular design to a new level. Want to add a fully adjustable headpiece with drops? Our headpieces are fully upgradable. In fact all of our options can be added after you purchase your table. You can even add elevation to your tilting headpiece as an option later. Never before has upgrading been so easy and quick with no need to "trade-in" when you want more features.

95000

Our tilt-only headpiece with non-adjustable face cushions comes standard on your ES2000. The simple finger touch lock allows you to position the headpiece throughout a full 40° in a single hand operation. The perfect basic headpiece, the 95000 will give you plenty of function.

95001

Our first optional tilting headpiece adds adjustable face cushions to keep your patient comfortable. The spring pin-lock assures simple adjustment with a secure position that won't change unless you change it. A simple one handed operation allows you to choose between five different cushion positions. Remember that you can upgrade later to add drops and elevation.

95002

With the addition of a forward motion drop, the 95002 gives you the added flexibility you need. With five position adjustable face cushions and the ability to tilt throughout 40°, this headpiece is the perfect choice for Pierce Drop work. As with all our headpieces, you can upgrade later to add elevation and toggle drop.

95003

If you don't use drops but need elevation and tilt, this is the headpiece for you. A gas assist spring lifts the headpiece eight inches straight up with no effort at all. The smooth motion of this headpiece assures your side lying patients will be very comfortable during treatment.

95004

When no compromise will do, the 95004 is the answer. Tilt, elevation, adjustable face cushions and both toggle and forward motion drop all in one package. The smooth gas spring lifts the headpiece up eight inches, and effortless tilting makes your job of headpiece adjustments a simple task. Accelerator II drops on the headpiece assures fast, clean, drops with no surprises. And the five position adjustable cushions keep your patients comfortable throughout the adjustment.

Optional modular headpieces can accommodate most any technique.
