

Headpieces

Choice of 5 models...
from basic tilt to full drops.

58474: Tilt, +/- 20° fixed cushions (Standard)

Optional Headpieces

- 58476: Tilt, +/- 20°, adjustable cushions
- 58475: Tilt +/- 20°, forward and toggle drop, adjustable cushions
- 58473: Tilt +/- 20°, elevation 9" (23 cm), adjustable cushions
- 58472: Tilt +/- 20°, elevation 9" (23 cm), forward and toggle drop, adjustable cushions

Ergonomics:

- Correct placement of controls
- Ergonomic handles
- 18:1 lifting ratio on drop lift handles
- Free falling accelerating drops
- Gas spring assist on headpieces and Break-Away Chest
- Counterbalanced manual flexion for fingertip control

Accelerator™ III Drops

A drop like no other. In 1991 we stunned the market with our first Accelerator™ Drop. Nine years later we created the world's only modular drop. Today, Accelerator III continues the tradition of constant evolution in design. Full-cushion, free-falling with no dead spots. Don't settle for less. It not only looks different, it feels different. Only available on ErgoStyle.

Manual Drops:

- Bilateral controls for cocking and tension
- 18:1 lifting ratio
- Full-cushion action
- Quieter design
- Fully upgradeable

- 58353 Accelerator III Thoracic Drop
- 58354 Accelerator III Lumbar Drop
- 58355 Accelerator III Pelvic Drop

Air Cocking Drops:

- Selector switches for Thoracic, Lumbar, and Pelvic
- Bilateral manual cocking handles and tensioning
- All include manual cocking handles
- Upgradeable from manual drops
- Patented modular design for easy field upgrades (Patent# 6,679,905)
- Infinitely adjustable speed control for drop cocking (patent pending)
- 250 lb. (113 kg) lift per drop

ErgoStyle™ FX Specifications

Catalog Number: 5820 Manual Drops,
5822 Auto Cocking Drops

Table Height: Variable from 19" (48 cm) to 32" (81 cm)

Speed: 19" (48 cm) to 32" (81 cm) in 7.7 seconds

Cushion Width: 23.5" (60 cm)

Lifting Capacity: 400 lbs. (181 kg)

Manual Flexion: 17°

Manual Extension: 14°

Manual Side Bending : 40° total

AutoFlexion: 15° flexion

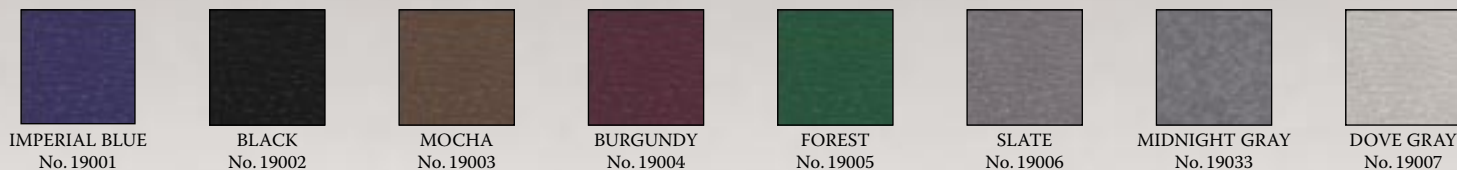

AutoFlexion: 12° extension

AutoFlexion Speed: 0.5°/second to 6.5°/second

Table Length: from 69.5" (177 cm) to 76" (193 cm)

Table Weight: 320 lbs. (145 kg)

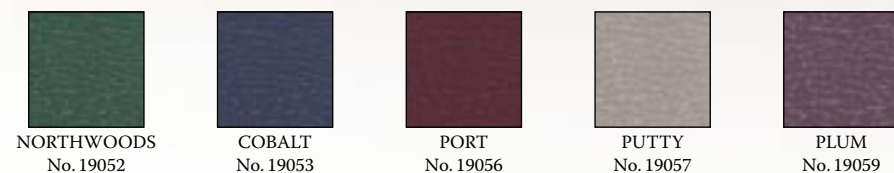

STANDARD COLORS

DESIGNER COLORS

RHINOHYDE™ COLORS

RhinoHyde from Chattanooga Group is a unique vinyl product supported by a tough synthetic textile padding. It is 30% thicker than standard upholstery. In strict compliance with US governmental fire codes, RhinoHyde is flame resistant. A superior upholstery for medical applications, RhinoHyde is also bacteriostatic, mildew resistant, and oil resistant.

Designer Colors and RhinoHyde Colors carry a slight upcharge. RhinoHyde is warranted for two years against manufacturing defects which lead to cracking, peeling, or delamination of properly cared for material. NOTICE: This color chart is produced within the limitations of lithographic color printing and is intended as a general guide only.

ERGOSTYLE BY CHATTANOOGA GROUP

Reinventing the Adjusting Table

In 1991 we decided it was time to create a Chiropractic table line that was so different, it required a new definition. Tables of the past were just that, steeped in the past and didn't evolve to address the core needs of the present day Chiropractor. We decided to create a table line that was truly "new". Our decision was based in the belief that present tables were not addressing the most fundamental requirement, a truly ergonomic and fully functional design. Not just a new name, but also a clean slate. For the first time in table history a multi-disciplined design team was assembled to find out what a Chiropractic table should look like, how it should function, and how it should perform every day under the most demanding situations. Most of all do it with unequalled sophistication. ErgoStyle was born. Everything is fresh, revolutionary and new. It took us only ten short years to become the table everyone is talking about. We are sure you will agree the ErgoStyle product line represents all that makes a Chiropractic table unique, and says it with a style and design second to none. It is our goal everyday to improve the way the world is treated by you. For the first time in many years, "new" really means new.

Introducing the New ErgoStyleFX Adjusting Table

- Contemporary computer design
- Ultra smooth counterbalanced flexion
- Patented modular drops for future upgrades
- Electric elevation from 19" to 33"
- Full flexion at lowest height

Optional

- 5 headpieces available
- AutoFlexion®
- Accelerator™ III Manual or Air Cocking Drops
- Break-Away chest with spring assist
- T-Bar for manual flexion

Headpieces

Choice of 5 models from basic tilting, to full drops. We have five different models to meet your demands. All elevating headpieces have gas assisted springs to eliminate the weight you need to lift. Four of our headpieces have fully adjustable face cushions for patient comfort.

Variable Height

Advancements in computer design allows the ErgoStyle FX Adjusting Table to start at a low height of 19" (48 cm) and retain the full degree of manual or auto flexion. Elevate your ErgoStyle FX Adjusting Table throughout the full range to 32" (81 cm) in as little as 7.7 seconds with our smooth, quiet electric motor. Power is never a concern with a lifting capacity of 400 lbs. The fully enclosed lifting mechanism complements the contemporary design.

All New Manual Flexion Distraction

With our newest design you will never struggle with manual flexion distraction again. The infinitely variable electric spring tension is distributed in such a way to allow for fingertip effort in moving the caudal section in any direction. Flexion, extension or circumduction, whatever your choice, they are all smooth, counterbalanced and lockable. Best of all, the spring tension is adjustable with a foot pedal.

- Flexion: 17°
- Extension: 14°
- Side Bending: 40° total

Manual Drops / Air Cocking Drops

Accelerator III is our newest design. Continuing on our quest for the perfect drop, we took the challenge head on. Quieter, quicker and still the world's first and only modular drop design. No dead spots or surprises. Our drops will accelerate faster with increased tension, unlike our competitors who make you work harder when the drop is under tension. Our patented design looks and performs like no other in the world. ErgoStyle drops are tested to perform flawlessly, at a price you won't believe! Now available with Auto Air Cocking Drops with Speed Control as an option.

ErgoStyle FX - Cat. No. 5820
*Shown with optional accessories

Seamless Cushions

We eliminated the need for seams and stitching and kept the smooth design element with our heat formed covering. Underneath is a multidensity two-layer foam unique to Ergostyle. It gives your patient the softness they need with a 1.5" (4 cm) overlayment, but is extra firm underneath to support the adjustment you want. Fitted with multidensity foam for ultimate patient comfort and crisp drop response.

Break-Away Elevating Chest

Patient "fit" is assured with our gas spring assisted adjustable chest section

- Infinite adjustment +/- 20°
- Locking in all ranges
- Gas assisted lift for effortless movement
- Single-side or Dual-side controls available

Upgrade to AutoFlexion

Another Ergostyle first! Treat your patient with manual flexion and find the treatment range. Tell the ErgoStyle FX table what range you want by tapping the foot pedal, and it remembers the starting and ending range. Activate the Autoflexion and this range will be repeated at whatever speed you choose from 15° flexion to 12° extension. Complete control with manual flexion and reproduction in the automatic mode. All critical information is displayed for your treatment notes:

Range: displays actual degrees in real time
Speed: variable from 0.5°/second to 6.5°/second
Timer: 1-99 mins
Display:

- Flexion Degrees
- Extension Degrees
- Time
- Speed
- Angle

Reinventing the Adjusting Table

Take a look at these ErgoStyle FX Standard Features

- Attractive Style
- Laser cut, robotically welded frames
- Powder coated paint
- Seamless cushions
- Bilateral ergonomic controls
- New lower 19" starting height for elevation and flexion
- Fully counterbalanced manual flexion with electric tension
- Extending self locking ankle rest with ankle cuffs
- Fully modular design for future upgrades.

Personalize your ErgoStyle FX Adjusting Table from this list of options

- AutoFlexion
- Tilting, elevating headpieces with full drops
- Break-Away / elevating chest
- Manual Cocking Accelerator™ III Drops
- Air Cocking Accelerator™ III Drops with Speed Control
- Dual Controls for Break-Away Chest
- Dual Controls for Elevation
- Dual Controls for Auto Cocking Drops
- Custom Upholstery
