ERGOSTYLE™ HYLO

Reinventing the Adjusting Table

In 1991 we decided it was time to create a Chiropractic table line that was so different, it required a new definition. Tables of the past were just that, steeped in the past and didn't evolve to address the core needs of the present day Chiropractor. We decided to create a table line that was truly "new". Our decision was based in the belief that present tables were not addressing the most fundamental requirement, a truly ergonomic and fully functional design. Not just a new name, but also a clean slate. For the first time in table history a multi-disciplined design team was assembled to find out what a Chiropractic table should look like, how it should function, and how it should perform every day under the most demanding situations. Most of all do it with unequalled sophistication. ErgoStyle was born. Everything is fresh, revolutionary and new. It took us only ten short years to become the table everyone is talking about.

We are sure you will agree the ErgoStyle product line represents all that makes a Chiropractic table unique, and says it with a style and design second to none. It is our goal everyday to improve the way the world is treated by you. For the first time in many years, "new" really means new.

Introducing the New ErgoStyle HYLO

- Contemporary computer design
- Patented modular drops for future upgrades (Patent# 6,679,905)
- Electric powered front and rear sections
- Tuck-away foot board
- Powerful hydraulics for tilt

Optional

- 5 headpieces available
- Accelerator III™ Drops
- Air Cocking Drops
- Gas springs for chest and pelvic lifts

Headpieces

Choice of 5 models from basic tilting, to full drops. We have five different models to meet your demands. All elevating headpieces have gas assisted springs to eliminate the weight you need to lift. Four of our headpieces have fully adjustable face cushions for patient comfort.

Powered Front and Rear Sections

- Full power adjustment of table length
- Silent electric actuators for each table section
- Independent controls for front and rear
- **Front:** Extends 14.5" (37cm)
- **Rear:** Extends 14.5" (37cm)
- **Table Length Range:** 4'6" to 6'11" (137 cm to 212 cm)

Constant Flow Hydraulics

- Whisper quiet gear drive hydraulics
- Constant tilt speed regardless of patient's weight and height
- **Tilt Up:** 8 seconds
- **Tilt Down:** 11 seconds regardless of patient weight (patent pending)
- **Lifting Capacity:** 400 lbs. (181 kg) at maximum table length

Manual Drops

Accelerator III is our newest design. Continuing on our quest for the perfect drop, we took the challenge head on. Quieter, quicker and still the world's first and only modular drop design. No dead spots or surprises. Our drops will accelerate faster with increased tension, unlike our competitors who make you work harder when the drop is under tension. Our patented design looks and performs like no other in the world. ErgoStyle drops are tested to perform flawlessly, at a price you won't believe!

Break-away Elevating Chest

- Patient "fit" is assured with our gas spring assisted adjustable chest section
- Infinite adjustment +/- 20 degrees
 - Locking in all ranges
 - Gas assisted lift for effortless movement
 - Single-side or Dual-side controls available

Elevating Pelvic Section

- Gas spring assisted for ease of use.
- Infinite adjustment + 20 degrees
 - Locking in all ranges
 - Gas assisted lift for effortless movement
 - Single-side or Dual-side controls available

Seamless Cushions

We eliminated the need for seams and stitching and kept the smooth design element with our heat formed covering. Underneath is a multidensity two-layer foam unique to Ergostyle. It gives your patient the softness they need with a 1.5" (4 cm) overlayment, but is extra firm underneath to support the adjustment you want. Fitted with multidensity foam for ultimate patient comfort and crisp drop response.

Tuck-away Foot Board

- Gets out of your way to allow for unimpeded leg checks
- Four point link for increased stability
 - Formed steel plate with non-slip surface
 - Rubber feet underneath to increase patient confidence
 - Rests on floor in up position for extra table stability

ErgoStyle HYLO - Cat. No. 9510

ERGOSTYLE™ HYLO

Reinventing the Adjusting Table

Take a look at these ErgoStyle Standard Features

- Attractive Style
- Laser cut, robotically welded frames
- Powder coated paint
- Seamless cushions

- Air Cocking/Manual Drops with Speed Control
- Dual controls for Break-away Chest and Elevating Pelvic
- Dual controls for HYLO Tilt
- Dual controls for Auto Cocking Drops
- Custom Upholstery

Headpieces

Choice of 5 models...

from basic tilt to full drops.

95000: Tilt, +/- 20 degrees fixed cushions (Standard)

Optional Headpieces

95001: Tilt, +/- 20 degrees, adjustable cushions

95002: Tilt +/- 20 degrees, forward drop, adjustable cushions

95786: Tilt +/- 20 degrees, elevation 9" (23 cm), adjustable cushions

95787: Tilt +/- 20 degrees, elevation 9" (23 cm), forward and toggle drop, adjustable cushions

Ergonomics:

- Correct placement of controls
- Ergonomic handles
- Mechanical advantage on drop lift handles
- Free falling accelerating drops
- Gas spring assist on headpieces, chest, and pelvic drops.
- Powered front and rear sections

Accelerator III™ Drops

A drop like no other. In 1991 we stunned the market with our first Accelerator™ Drop. Nine years later we created the worlds only modular drop. Today, Accelerator III continues the tradition of constant evolution in design. Full-cushion, free-falling with no dead spots. Don't settle for less. It not only looks different, it feels different. Only available on ErgoStyle.

Manual Drops:

- Bilateral controls for cocking and tension
- 18 to 1 lifting ratio
- Full-cushion action
- Quieter design
- Fully upgradeable

95733 Accelerator III Thoracic Drop

95734 Accelerator III Lumbar Drop

95735 Accelerator III Pelvic Drop

Air Cocking Drops:

- Selector switches for Thoracic, Lumbar, and Pelvic
- Bilateral manual cocking handles and tensioning
- All include manual cocking handles
- Upgradeable from manual drops
- Patented modular design for easy field upgrades (Patent# 6,679,905)
- Infinitely adjustable speed control for drop cocking (patent pending)
- 250 lb. (113 kg) lift per drop

95746 Thoracic Air/Manual Drop

95747 Lumbar Air/Manual Drop

95748 Pelvic Air/Manual Drop

95740 Dual Air Cocking Foot Pedals

ERGOSTYLE™
HYLO
Reinventing the Adjusting Table

ErgoStyle HYLO Specifications

Catalog Number: 9510

Table Height: 23.5" (60 cm)

Cushion Width: 23.5" (60 cm)

Lifting Capacity: 400 lbs (181 kg)

Tilting Degrees: 0 to 63 degrees

Tilting Mechanism: Gear drive hydraulics with "soft stops" up and down

Tilt-Up Speed: 8 seconds

Tilt-Down Speed: 11 seconds (with 2 step safety control)

Tilt Foot Pedal: Single (standard) Dual (optional)

Powered Front: Extends 14.5" (37 cm)

Powered Rear: Extends 14.5" (37 cm)

Table Length: 4'6" to 6' 11" (137 cm to 212 cm)

Footplate: Tuck-away

Table Weight: 405 lbs (184 kg)

Modular Design: Allows for future upgrades in table, drops, and headpieces
